

Kofax ControlSuite Foundations for SMB

Cost-effectively secure, govern and manage your documents with content-aware capture, print management and workflow process automation

The Digital Age Requires a New Way of Working

As small-to-medium businesses (SMBs) strive to stay abreast of our digital economy, they must address their capture, print and workflow challenges. Add in the acceleration of remote workforces and the need to ensure business continuity, and the likelihood of greater risks and costs will only increase.

Like their larger counterparts, SMBs continue to rely on print to support their business activities, but in many cases, their efforts remain inefficient and costly with inadequate security.

On average, SMB's lose \$79,841 to cybercrime annually and 43% of cyberattacks target small businesses. In addition, reducing paper usage is rated as the top print management challenge, particularly among larger SMBs.

Kofax ControlSuite Foundations for SMB is a fully integrated content-aware solution for capture, print, mobile and workflow automation specifically designed to help small- to medium-size businesses do more with less. It does the heavy lifting of a powerful, enterprise-grade capture and print management solution on a smaller budget, yet provides room for growth. SMBs can now cost-effectively manage, secure, and govern their documents through unified and mobile printing, scanning and workflow processes.

Importantly, as the new normal increasingly includes often-permanent hybrid workforces, SMBs can leverage capabilities such as Follow-You printing with secure print job release as well as mobile capture to ensure security and compliance from any location without disrupting their business processes.
